Medical and Dental Mission

By Joe Domond

Jeff Cherubin Domond Foundation is ready to organize its third annual medical mission trip to Haiti where a group of doctors, dentists, other medical professionals and supporters travel to this poor country and help out those in need.

In March of 2009 at our first trip we cared for over 500 people in five days and in March of 2010 we cared for over 1,000 people. This year is going to be our third trip and we are planning to help more people.

The people of Haiti are desperate after the earthquake of last January, they need help and the Foundation needs yours. Please help us make this trip a reality. We need money, medical and dental supplies, medication, doctors, nurses, and anyone who would like to travel with us in this endeavor. For further information, please contact Joe or Rita Domond at 909.816.7207 or email us at info@jeffdomondfoundation.org.

My mission trip to Haiti, by Dr. Carmel Pradel

Dear Joe & Rita,

This was my first trip to Haiti after 25 years. Thank you for providing the chance to reconnect to Haiti and the Haitian people. When I left Haiti at age 12, my goal was to select a profession that could be easily utilized in Haiti – to serve the Haitian population. This trip reminded me of one of my motivations for all the studies that I did and the degree behind my name. I truly felt it was a privilege to use my skills as an oral surgeon with the Haitian people. The patients were so courteous and grateful, such as Lita, the lady that offered to braid my hair as a way to thank me for the service I rendered to her.

She waited all day from 6:00am to 3:00pm to be able to return the favor to me.

I wish I could have done more in the 5 days that I was there. There is such a great need for

dental care in the community. I vote for recruiting more doctors, maybe double the numbers that we had on this trip so we do not turn anyone away. The community of Marbial deserves better and I am glad that you, your sister Hermione and Father Bertrand are there to see that help does come to the area. The work that you are doing will multiply – that's my belief. Thank you for caring and for founding this Foundation in the name of Jeff Cherubin Domond.

Love, Dr. Pradel

Please help us bring safe drinking water to Haiti.

The quest for clean water dominates Haitian life. A lot of Haitian people die each year from drinking unsafe water. After last January's earthquake one of the most common reasons for dying is the lack of access to clean and safe drinking water.

In the spirit of brotherhood, Jeff Cherubin Domond Foundation stepped up to get clean water to Haitian communities. We have established contact with a manufacturer who builds HydrAid® BioSand Water Filter systems www.hydroaid.org. These simple filters have no moving parts, require no electricity, and can combat the leading causes of waterborne death and diseases by reducing parasites, bacteria and viruses found in contaminated water. One filter is designed to deliver 100 gallons of safe water per day for a family of 8 to 10 people for more than 10 years.

Our goal is to put the water filtering system into schools, clinics, homes and other public places in Haiti. We are partnering with Pure Water for the World to install these systems and train locals on their use and upkeep. A \$100.00 donation covers the cost of purchasing, shipping, and installing a HydrAid® BioSand Water Filter system.

This system offers life saving benefits such as:

- Consistently producing enough safe water to meet daily household needs for drinking, bathing and washing
- Dramatically reducing diarrhea, skin and urinary tract infections

- Improving health and strength to work, and to go to school
- Clean, safe water for less than 3¢ a day
- Significantly reducing household labor burdens to secure clean water
- Saving wood/fuel used to boil water
- Significantly reducing the carbon footprint caused by stoves, boiling water, etc.
- Saving money otherwise spent on water
- Suitable in the most demanding environments

Haiti needs your help, please visit the Jeff Cherubin Domond Foundation website at JeffCDomondFoundation.org and click on [Donate A Filter Now](#) to support our work. Support sister schools and churches in water, health, hygiene connected education. Together, we can make waterborne diseases and water related-death a thing of the past.

We are thankful for all who act to bring health and hope to our brothers and sisters in Haiti.
